Biosynthesis and Degradation

Biosynthesis of ergotamine by *Claviceps purpurea* (Fr.) Tul.
By R. A. Bassett, E. B. Chain & K. Corbett 1

Effects of infection with *Diplococcus pneumoniae* on synthesis of ribonucleic acids in rat liver.
By W. L. Thompson & R. W. Wannemacher, Jr. 79

Studies on the biosynthesis of cytochrome *c*.
By E. M. Colleran & O. T. G. Jones 89

A study of some enzymes of glycerolipid biosynthesis in rat liver after subtotal hepatectomy.
By E. H. Mangiapane, K. A. Lloyd-Davies & D. N. Brindley 103

Microbial metabolism of amino alcohols. 1-Aminopropan-2-ol and ethanolamine metabolism via propionaldehyde and acetaldehyde in a species of *Pseudomonas*.
By A. Jones & J. M. Turner 167

The regulation of poly-β-hydroxybutyrate metabolism in *Azotobacter beijerinckii*.
By P. J. Senior & E. A. Dawes 225

β-Ketothiolase from *Hydrogenomonas eutropha* H16 and its significance in the regulation of poly-β-hydroxybutyrate metabolism.
By V. Oeding & H. G. Schlegel 239

Ribonucleic acid synthesis in chloroplasts.
By M. R. Hartley & R. J. Ellis 249

An investigation into the role of malonyl-coenzyme A in isoprenoid biosynthesis.
By M. J. P. Higgins & R. G. O. Kekwick 295

Fatty acid synthesis in the brown fat and liver of foetal and newborn rabbits (*Short Communication*).
By J. Iliffe, B. L. Knight & N. B. Myant 341

The detection of the messenger ribonucleic acid for the α-lactalbumin of guinea-pig milk (*Short Communication*).
By P. N. Campbell, D. McIlreavy & D. Tarin 345

Bioenergetics

Amino acid absorption by mouse ascites-tumour cells depleted of both endogenous amino acids and adenosine triphosphate.
By M. Morville, M. Reid & A. A. Eddy 11

PAGE

Studies with a reconstituted muscle glycolytic system. The rate and extent of creatine phosphorylation by anaerobic glycolysis.
By R. K. Scopes 197

Subcellular Structures

Studies on the enzymology of purified preparations of brush border from rabbit kidney.
By S. G. George & A. J. Kenny 43

A comparison of D-inositol 1:2-cyclic phosphate 2-phosphohydrolase with other phosphodiesterases of kidney.
By R. M. C. Dawson & N. G. Clarke 59

Heterogeneous distribution of glucose 6-phosphatase in rat liver microsomal fractions as shown by adaptation of a cytochemical technique.
By J. A. Lewis & J. R. Tata 69

Effect of L-leucine on the nitrogen metabolism of isolated rat liver mitochondria.
By J. D. McGivan, N. M. Bradford, M. Crompton & J. B. Chappell 209

Fluorocitrate inhibition of aconitate hydratase and the tricarboxylate carrier of rat liver mitochondria.
By M. D. Brand, S. M. Evans, J. Mendes-Mourão & J. B. Chappell 217

Cellular Interactions and Control Processes

The uptake of γ-aminobutyrate by organotypic cultures of chick spinal cord.
By G. Tunnicliff, Y. D. Cho, N. Blackwell, R. O. Martin & J. D. Wood 27

Selective release of lysosomal hydrolases from phagocytic cells by cytochalasin B.
By P. Davies, A. C. Allison & A. D. Haswell 33

Activities of hexokinase, phosphofructokinase, 3-oxo acid coenzyme A-transferase and acetoacetyl-coenzyme A thiolase in nervous tissue from vertebrates and invertebrates.
By P. H. Sugden & E. A. Newsholme 97

The use of deoxyribonucleic acid–cellulose chromatography and isoelectric focusing for the characterization and partial purification of steroid–receptor complexes.
By W. I. P. Mainwaring & R. Irving 113

PAGE

A reappraisal of the effects of adenosine 3′:5′-cyclic monophosphate on the function and morphology of the rat prostate gland.
By F. R. Mangan, A. E. Pegg & W. I. P. Mainwaring 129

Induction and suppression of the key enzymes of glycolysis and gluconeogenesis in isolated perfused rat liver in response to glucose, fructose and lactate.
By J. M. Wimhurst & K. L. Manchester 143

Regulation of renal gluconeogenesis by calcium ions, hormones and adenosine 3′:5′-cyclic monophosphate.
By A. Roobol & G. A. O. Alleyne 157

Problems associated with the assay of arylsulphatases A and B of rat tissues.
By M. Worwood, K. S. Dodgson, G. E. R. Hook & F. A. Rose 183

Relative distribution of arylsulphatases A and B in rat liver parenchymal and other cells.
By G. E. R. Hook, K. S. Dodgson, F. A. Rose & M. Worwood 191

Lethal effect of rifampicin in *Bacillus subtilis* as a complicating factor in the assessment of the lifetime of messenger ribonucleic acid.
By J. G. Coote, D. A. Wood & J. Mandelstam 263

PAGE

Control of the production of exo-β-*N*-acetylglucosaminidase by *Bacillus subtilis* B. Derepression during gluconeogenesis and initial stages of sporulation.
By S. J. Brewer & R. C. W. Berkeley 271

The nature of the acid-volatile selenium in the liver of the male rat.
By A. T. Diplock, C. P. J. Caygill, E. H. Jeffery & C. Thomas 283

Adenosine 3′:5′-cyclic monophosphate concentrations and phosphodiesterase activities during axenic growth and differentiation of cells of the cellular slime mould *Dictyostelium discoideum*.
By A. M. Malkinson & J. M. Ashworth 311

The mode of action of adenosine 3′:5′-cyclic monophosphate in mammalian islets of Langerhans. Effects of insulin secretagogues on islet-cell protein kinase activity.
By W. Montague & S. L. Howell 321

Comparative studies on the carbohydrate-containing membrane components of normal and adenosine 3′:5′-cyclic monophosphate-treated Chinese-hamster ovary cells.
By M. M. Baig & R. M. Roberts 329

Development

Increased liver L-serine–pyruvate aminotransferase activity under gluconeogenic conditions (*Short Communication*).
By E. V. Rowsell, A. H. Al-Tai, J. A. Carnie & K. V. Rowsell 349

Contents of Volume 134, No. 2

PAGE

Biosynthesis and Degradation

The microbial metabolism of thiophen-2-carboxylate.
By R. E. Cripps 353

Studies of cytochrome synthesis in rat liver.
By R. Druyan, S. Jakovcic & M. Rabinowitz 377

Biosynthesis of glycosaminoglycans by cultured mastocytoma cells.
By R. G. Lewis, A. F. Spencer & J. E. Silbert 455

Biosynthesis of glycosoaminoglycans by microsomal preparations from cultured mastocytoma cells.
By R. G. Lewis, A. F. Spencer & J. E. Silbert 465

PAGE

The biosynthesis of glucagon in perfused rat pancreas.
By K. J. O'Connor, A. Gay & N. R. Lazarus 473

Adenosine 5′-sulphatophosphate kinase activity in spinach leaf tissue.
By J. N. Burnell & J. W. Anderson 565

Some aspects of carnitine metabolism in avocado (*Persea americana*) (*Short Communication*).
By R. A. Panter & J. B. Mudd 655

Formation of ceramide phosphorylethanolamine from phosphatidylethanolamine in the rumen protozoon *Entodinium caudatum* (*Short Communication*).
By T. E. Broad & R. M. C. Dawson 659

PAGE

Bioenergetics

Xylitol metabolism in the isolated perfused rat liver.
By H. F. Woods & H. A. Krebs 437

Metabolic alterations produced in the liver by chronic ethanol administration. Increased oxidative capacity.
By L. Videla, J. Bernstein & Y. Israel 507

Metabolic alterations produced in the liver by chronic ethanol administration. Changes related to energetic parameters of the cell.
By J. Bernstein, L. Videla & Y. Israel 515

Metabolic alterations produced in the liver by chronic ethanol administration. Comparison between the effects produced by ethanol and by thyroid hormones.
By Y. Israel, L. Videla, A. Macdonald & J. Bernstein 523

Site of inhibition by 2-amino-1,1,3-tricyanopropene of photosynthetic oxygen evolution by spinach leaf chloroplasts (*Short Communication*).
By E. M. Burden & A. A. Horton 663

Subcellular Structures

The distribution of ribosomes between different functional states in livers of fed and starved mice.
By M. Norman, S. Gamulin & K. Clark 387

Isolation and properties of cholesterol ester-storage granules from ovarian tissues.
By D. T. Armstrong & A. P. F. Flint 399

Amino acid production in isolated rat liver mitochondria.
By W. Ferdinand, W. Bartley & V. Broomhead 431

The localization of enzymes of intermediary metabolism in *Astasia* and *Euglena*.
By N. Bégin-Heick 607

Cellular Interactions and Control Processes

The effect of ethanol on drug oxidations *in vitro* and the significance of ethanol–cytochrome *P*-450 interaction.
By D. L. Cinti, R. Grundin & S. Orrenius 367

Influence of luteinizing hormone and adenosine 3′:5′-cyclic monophosphate on the metabolism of free and esterified cholesterol in mouse Leydig-cell tumours.
By W. R. Moyle, R. L. Jungas & R. O. Greep 407

PAGE

Metabolism of free and esterified cholesterol by Leydig-cell tumour mitochondria.
By W. R. Moyle, R. L. Jungas & R. O. Greep 415

Effect of leucine on enzymes of the tryptophan–niacin metabolic pathway in rat liver and kidney.
By Ghafoorunissa & B. S. Natasinga Rao 425

Synthesis and degradation of phosphoenolpyruvate carboxylase in rat liver and adipose tissue. Changes during a starvation–re-feeding cycle.
By M. F. Hopgood, F. J. Ballard, L. Reshef & R. W. Hanson 445

Regulation of insulin release from isolated islets of Langerhans of the rat in pregnancy. The role of adenosine 3′:5′-cyclic monophosphate.
By I. C. Green, S. L. Howell, W. Montague & K. W. Taylor 481

Relationship between plasma and muscle concentrations of ketone bodies and free fatty acids in fed, starved and alloxan-diabetic states.
By O. E. Owen, H. Markus, S. Sarshik & M. Mozzoli 499

Effect of phenylpyruvate on pyruvate dehydrogenase activity in rat brain mitochondria.
By J. M. Land & J. B. Clark 539

Effect of phenylpyruvate on enzymes involved in fatty acid synthesis in rat brain.
By J. M. Land & J. B. Clark 545

Effects of azaserine and nicotinamide on insulin release and nicotinamide–adenine dinucleotide metabolism in isolated rat islets of Langerhans.
By D. J. Deery & K. W. Taylor 557

A model study of the fructose diphosphatase–phosphofructokinase substrate cycle.
By D. P. Bloxham, M. G. Clark, P. C. Holland & H. A. Lardy 581

Appendix: The theoretical estimation of substrate cycling *in vivo*.
By D. P. Bloxham, M. G. Clark, D. M. Goldberg, P. C. Holland & H. A. Lardy 586

Estimation of the fructose diphosphatase–phosphofructokinase substrate cycle in the flight muscle of *Bombus affinis*.
By M. G. Clark, D. P. Bloxham, P. C. Holland & H. A. Lardy 589

Concentration of adenosine 3′:5′-cyclic monophosphate in mouse pancreatic islets measured by a protein-binding radioassay.
By R. H. Cooper, S. J. H. Ashcroft & P. J. Randle 599

PAGE

Effect of administration of fructose on the glycogenolytic action of glucagon. An investigation of the pathogeny of hereditary fructose intolerance.
By G. Van den Berghe, L. Hue & H. G. Hers 637

The uptake of [^{45}Ca]calcium ions by matrix vesicles isolated from calcifying cartilage (*Short Communication*).
By S. Y. Ali & L. Evans 647

Activation of pyruvate dehydrogenase in perfused rat heart by dichloroacetate (*Short Communication*).
By S. Whitehouse & P. J. Randle 651

Influence of cholecalciferol (vitamin D_3) on the initial kinetics of the uptake of calcium ions by rat small-intestinal mucosa (*Short Communication*).
By J. M. O'Donnell & M. W. Smith 667

PAGE

Acceleration of gluconeogenesis from lactate by lysine (*Short Communication*).
By N. W. Cornell, P. Lund, R. Hems & H. A. Krebs 671

Metabolism in Whole Organisms

Utilization of gluconate by *Escherichia coli*. Induction of gluconate kinase and 6-phosphogluconate dehydratase activities.
By H. L. Kornberg & A. K. Soutar 489

Exogenous cholesterol transport in rabbit plasma lipoproteins.
By L. L. Rudel, J. M. Felts & M. D. Morris 531

Regulation of uptake of purines, pyrimidines and amino acids by *Candida utilis*.
By R. W. Jones & D. G. Wild 617

Determination and significance of L-tyrosine *O*-sulphate and its deaminated metabolites in normal human and mouse urine.
By P. M. Hext, S. Thomas, F. A. Rose & K. S. Dodgson 629

Contents of Volume 134, No. 3

PAGE

Biosynthesis and Degradation

Insulin biosynthesis in the bullhead, *Ictalurus nebulosus*, and the effect of temperature.
By M. L. Moule & C. C. Yip 753

Polyprenyl pyrophosphate–*p*-hydroxybenzoate polyprenyltransferase activity in mitochondria of broad-bean seeds and yeast (*Short Communication*).
By G. Thomas & D. R. Threlfall 811

Protein synthesis *in vitro* in a system from plant mitochondria (*Short Communication*).
By B. B. Goswami, S. Chakrabarti, D. K. Dube & S. C. Roy 815

Aberration of porphyrin metabolism in iron-deficient anaemic rats (*Short Communication*).
By D. C. Sharma 821

Inhibition of phosphatidylcholine synthesis in mammary tissue by 2-chloroethyltrimethylammonium chloride (*Short Communication*).
By J. P. Infante & J. E. Kinsella 825

The apparent stimulation of proteolysis by adenosine triphosphate in tissue homogenates (*Short Communication*).
By D. F. Goldspink & A. L. Goldberg 829

PAGE

Bioenergetics

Accumulation of amino acids by the perfused rat liver in the presence of ethanol.
By H. A. Krebs, R. Hems & P. Lund 697

The electron-transport system of mitochondria from the slime mould *Physarum polycephalum*.
By R. Barnes, E. M. Colleran & O. T. G. Jones 745

The transport of inorganic phosphate by the mitochondrial dicarboxylate carrier.
By R. N. Johnson & J. B. Chappell 769

Subcellular Structures

The significance of promitochondrial structures in rat liver for mitochondrial biogenesis.
By J. G. Satav, M. S. Rajwade, S. S. Katyare, M. S. Netrawali, P. Fatterpaker & A. Sreenivasan 687

The mitochondrial generation of hydrogen peroxide. General properties and effect of hyperbaric oxygen.
By A. Boveris & B. Chance 707

PAGE

A study of the thermal stability of ribosomes and biologically active subribosomal particles.
By R. A. Cox, H. Pratt, P. Huvos, B. Higginson & W. Hirst 775

The control of the form and function of the ribosomes in androgen-dependent tissues by testosterone.
By W. I. P. Mainwaring & P. A. Wilce 795

Cellular Interactions and Control Processes

Regulation of nitrate reductase of *Neurospora* at the level of transcription and translation.
By G. J. Sorger & J. Davies 673

Decreased liver activity of porphyrin–metal chelatase in hepatic porphyria caused by 3,5-diethoxycarbonyl-1,4-dihydrocollidine. Studies in rats and mice.
By F. De Matteis, G. Abbritti & A. H. Gibbs 717

Inhibition of the biosynthesis of sterols by phenyl and phenolic compounds in rat liver.
By S. Ranganathan & T. Ramasarma 737

PAGE

Effects of pyridoxine deficiency and DL-*p*-chlorophenylalanine administration to rats on 5-hydroxytryptamine and noradrenaline concentrations in brain and 5-hydroxytryptamine concentration in blood.
By H. N. Bhagavan & D. B. Coursin 763

Regulation of vitamin D metabolism: factors influencing the rate of formation of 1,25-dihydroxycholecalciferol by kidney homogenates (*Short Communication*).
By K. W. Colston, I. M. A. Evans, L. Galante, I. MacIntyre & D. W. Moss 817

Development

Sialyltransferase: regulation of α-foetoprotein microheterogeneity during development (*Short Communication*).
By E. F. Zimmerman & M. M. Madappally 807

General Methods

Normalization in the fitting of data by iterative methods. Application to tracer kinetics and enzyme kinetics.
By J. H. Ottaway 729

Contents of Volume 134, No. 4

PAGE

Biosynthesis and Degradation

The metabolism of acetamidothiazoles in the rat. 2-Acetamido-, 2-acetamido-4-methyl- and 2-acetamido-4-phenyl-thiazole.
By D. H. Chatfield & W. H. Hunter 869

The metabolism of acetamidothiazoles in the rat. 2-Acetamido-4-chloromethylthiazole.
By D. H. Chatfield & W. H. Hunter 879

Effect of light on enzymes of phenylpropanoid metabolism and hispidin biosynthesis in *Polyporus hispidus*.
By A. M. D. Nambudiri, C. P. Vance & G. H. N. Towers 891

Microbial metabolism of amino alcohols. Metabolism of ethanolamine and 1-aminopropan-2-ol in species of *Erwinia* and the roles of amino alcohol kinase and amino alcohol *O*-phosphate phospho-lyase in aldehyde formation.
By A. Jones, A. Faulkner & J. M. Turner 959

PAGE

The presence of *N*-terminal methionine on nascent protein of rat liver and rabbit reticulocytes and its cleavage during polypeptide-chain elongation.
By A. Koffer-Gutmann & H. R. V. Arnstein 969

The degradation of intravenously injected chondroitin 4-sulphate in the rat.
By K. M. Wood, F. S. Wusteman & C. G. Curtis 1009

Metabolism of biphenyl. 2-Hydroxy-6-oxo-6-phenylhexa-2,4-dienoate: the *meta*-cleavage product from 2,3-dihydroxybiphenyl by *Pseudomonas putida*.
By D. Catelani, A. Colombi, C. Sorlini & V. Treccani 1063

Biosynthesis of serum albumin in rat liver. Evidence for the existence of 'proalbumin'.
By J. D. Judah, M. Gamble & J. H. Steadman 1083

PAGE

Carotenoid biosynthesis in a *Flavobacterium* sp.: stereochemistry of hydrogen elimination in the desaturation of phytoene to lycopene, rubixanthin and zeaxanthin (*Short Communication*).
By J. C. B. McDermott, G. Britton & T. W. Goodwin 1115

The specific radioactivity of the precursor pool for estimates of the rate of protein synthesis (*Short Communication*).
By E. B. Fern & P. J. Garlick 1127

Bioenergetics

Control of magnesium–protoporphyrin chelatase activity in *Rhodopseudomonas spheroides*. Role of light, oxygen, and electron and energy transfer.
By A. Gorchein 833

Biogenesis of mitochondria. The effects of physiological and genetic manipulation of *Saccharomyces cerevisiae* on the mitochondrial transport systems for tricarboxylate-cycle anions.
By M. Perkins, J. M. Haslam & A. W. Linnane 923

Biogenesis of mitochondria. A requirement for mitochondrial protein synthesis for the formation of a normal adenine nucleotide transporter in yeast mitochondria.
By J. M. Haslam, M. Perkins & A. W. Linnane 935

Biogenesis of mitochondria. The effects of altered membrane lipid composition on cation transport by mitochondria of *Saccharomyces cerevisiae*.
By J. M. Haslam, T. W. Spithill, A. W. Linnane & J. B. Chappell 949

Reconstitution of oxidative phosphorylation and the adenosine triphosphate-dependent transhydrogenase activity by a combination of membrane fractions from *uncA*$^-$ and *uncB*$^-$ mutant strains of *Escherichia coli* K12.
By G. B. Cox, F. Gibson & L. McCann 1015

The absorption of protons with specific amino acids and carbohydrates by yeast.
By A. Seaston, C. Inkson & A. A. Eddy 1031

Respiration-driven proton translocation by yeast mitochondria with differing efficiencies of oxidative phosphorylation.
By J. A. Downie & P. B. Garland 1045

PAGE

An antimycin A- and cyanide-resistant variant of *Candida utilis* arising during copper-limited growth.
By J. A. Downie & P. B. Garland 1051

Subcellular Structures

Quantitative characteristics of glutamate transport in rat liver mitochondria.
By N. M. Bradford & J. D. McGivan 1023

Cellular Interactions and Control Processes

A model for the regulation of δ-aminolaevulinate synthetase induction in rat liver.
By G. Padmanaban, M. R. Satyanarayana Rao & K. Malathi 847

Biochemical effects of the porphyrinogenic drug allylisopropylacetamide. A comparative study with phenobarbital.
By M. R. Satyanarayana Rao & G. Padmanaban 859

Effect of insulin on pyruvate metabolism in epididymal adipose tissue of the rat. Correlation of intracellular pyruvate contents and pyruvate dehydrogenase activity.
By B. G. Berman & M. L. Halperin 885

Glucose metabolism in the newborn rat. Hormonal effects *in vivo*.
By K. Snell & D. G. Walker 899

Histone acetylation and hormone action. Early effects of aldosterone on histone acetylation in rat kidney.
By P. R. Libby 907

Binding of parathyroid hormone to bovine kidney-cortex plasma membranes.
By H. S. Sutcliffe, T. J. Martin, J. A. Eisman & R. Pilczyk 913

Hormonal regulation of glycogen metabolism in neonatal rat liver.
By A. L. Schwartz & T. W. Rall 985

Effects of dichloroacetate on the metabolism of glucose, pyruvate, acetate, 3-hydroxybutyrate and palmitate in rat diaphragm and heart muscle *in vitro* and on extraction of glucose, lactate, pyruvate and free fatty acids by dog heart *in vivo*.
By A. McAllister, S. P. Allison & P. J. Randle 1067

PAGE

Biosynthesis of growth hormone in the rat anterior pituitary gland. Stimulation of biosynthesis *in vitro* by insulin.
By A. Betteridge & M. Wallis 1103

Changes in enzyme activities in tissues of rats exposed to hypoxia (*Short Communication*).
By A. Cryer & W. Bartley 1119

Cell-surface mucosubstances from trypsin disaggregation of normal and virus-transformed lines of baby-hamster kidney cells (*Short Communication*).
By S. M. Minnikin & A. Allen 1123
